ABOUT ME

Junior SAP Integration Consultant with hands-on experience in SAP BTP Integration Suite, developing and maintaining iFlows for SAP S/4HANA integrations via REST, SOAP/XML and IDoc adapters. Skilled in Groovy scripting, XSLT and message mappings, with additional exposure to SAP PI/PO environments. Background in full stack development, bringing a technical and analytical approach to integration challenges.

PROFESSIONAL EXPERIENCE

- SAP Consultant, Capgemini**2025 – Present | Langreo, Asturias
- Designed and developed iFlows in SAP BTP Integration Suite, covering SAP S/4HANA-to-external-system scenarios using REST (JSON), SOAP/XML, and IDoc adapters.
 - Implemented data transformations with Groovy scripting, XSLT, message mappings, and value mappings to meet client-specific business requirements.
 - Monitored integration flows in SAP Integration Suite Operations, resolved incidents, and performed root-cause analysis on failed message processing.
 - Contributed to API testing cycles using Postman, validating REST endpoints and verifying payload structures prior to production deployment.
 - Supported iFlow transport and lifecycle management across Dev / QA / Production landscapes.

Project — Consum (SAP BTP Integration Suite): Maintenance and support of existing iFlows, incident resolution and mapping adjustments in production.

Project — Leprino Foods (SAP PI/PO): Monitored interface message processing and tracked errors in the Integration Engine; gained hands-on exposure to PI/PO architecture alongside BTP Integration Suite.
